Education

Degree/Certificate	Institute	Year of Passing
B.Sc. (Hons.) CS	Indraprastha College for Women, University of Delhi	2027
12 th	St. Joseph's School, Barhalganj	2023
10 th Standard	St. Joseph's School, Barhalganj	2021

Projects

Personal Portfolio Website

2026

Personal Project | *HTML, CSS, JavaScript* | *GitHub Pages*

[GitHub](#) | [Live Demo](#)

- Designed and developed a complete personal portfolio website from scratch, featuring About, Selected Work, Certifications, and Contact sections with a clean, typographically refined aesthetic.
- Implemented a protected PDF resume viewer using PDF.js with right-click and download disabled, ensuring view-only access and preventing unauthorised copying.
- Integrated a live Canva design portfolio showcasing social media content, newsletters, and visual communication work alongside technical projects.
- Deployed and maintained via GitHub Pages with version control, demonstrating practical knowledge of front-end development and CI/CD deployment workflows.

Spendsmart – AI Expense Tracker

2026

Personal Project | *Flask, React, scikit-learn, SQLite* | *REST API*

[GitHub](#) | [Live Demo](#)

- Designed and built a full-stack expense tracking application with secure JWT-based authentication, enabling users to register, log in, and manage personal expense data through a protected REST API.
- Engineered a Flask and SQLAlchemy backend with CRUD endpoints for expense entries, category and monthly summary aggregation, and CSV export, backed by a normalised SQLite schema.
- Applied K-Means clustering (scikit-learn) across transaction amount, category, and weekday/weekend timing to generate personalised AI spending insights, such as flagging categories with disproportionate weekend spending.
- Built a responsive React (Vite) dashboard with Chart.js visualizations for category and monthly spending trends, paired with an AI insights panel that surfaces plain-language spending patterns.

Key Courses Taken

- **Computer Science:** Data Structures, Design and Analysis of Algorithms, Object-Oriented Programming with C++, Programming Using Python, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Theory of Computation, Unix Network Programming, Computer System Architecture, Front-End and Back-End Web Development

Covers core CS fundamentals including algorithm design, system-level programming, network architecture, and full-stack web development.

- **Mathematics:** Discrete Mathematical Structures, Mathematics for Computing, Probability for Computing, Numerical Methods, Introduction to Linear Algebra

Builds the mathematical foundation for computing – logic, combinatorics, probability, and linear algebra applied to computational problems.

- **Data & Digital:** Data Analysis and Visualization Using Python, Advanced Spreadsheet Tools, Digital Marketing

Focuses on real-world data handling, visual storytelling with Python, spreadsheet modelling, and digital outreach strategy.

Technical Skills

- **Programming Languages:** Python, C++, JavaScript, HTML, CSS, Node.js
- **Data & Analytics:** Microsoft Excel, Power BI, DAX, SQL (foundational), Pandas, Matplotlib, Data Analysis and Visualization Using Python
- **Frameworks & Libraries:** Flask, React (Vite), scikit-learn, Chart.js, PDF.js, SQLAlchemy, Jupyter Notebook
- **Developer Tools:** Git, GitHub, GitHub Pages, VS Code, Canva, PowerPoint
- **Specialisations:** Cybersecurity, Cloud Computing, Generative AI, Technical Writing, Content Strategy
- **Languages:** English (Fluent – Written & Verbal), Hindi (Native)

Achievements

- Built and deployed a full-stack AI Expense Tracker (Spendsmart) integrating JWT authentication, REST API, K-Means clustering for personalised spending insights, and a React dashboard with Chart.js visualizations.
- Launched a self-built portfolio website from scratch with responsive design, a protected PDF resume viewer, and full CI/CD deployment via GitHub Pages – covering the complete development lifecycle independently.
- Completed 6 professional certifications in Cybersecurity, Generative AI, Data Analytics, and Design from Google Cloud, University of Maryland, and Coursera.
- Active member of CyberMeet Society – coordinated placement seminars and career workshops for 50+ students, designed promotional campaigns, and authored post-event reports adopted by the society.

Certifications

- **Cybersecurity for Everyone** | *University of Maryland*
Gained foundational knowledge of cybersecurity threats, attack vectors, and defence mechanisms; developed skills to communicate security concepts to non-technical audiences.
- **Introduction to Generative AI** | *Google Cloud*
Studied how generative AI works, its applications in content creation and automation, and the ethical considerations around AI-generated outputs.
- **Introduction to Image Generation** | *Google Cloud*
Explored diffusion models and AI-powered image generation techniques, understanding how they are trained and applied in creative and technical workflows.
- **From Excel to Power BI** | *Knowledge Accelerators*
Completed hands-on training in migrating data workflows from Excel to Power BI, building DAX measures, Power Query transformations, and interactive analytical dashboards.
- **Corporate Newsletter Design with Canva** | *Coursera*
Designed branded newsletters and marketing collateral, applying layout composition, typography hierarchy, and colour theory to produce professional communication material.
- **Database Power Bootcamp** | *SkillEcted*
Built a strong foundation in database design, SQL querying, and data management principles through applied exercises on real-world datasets.

Experience

Placement Vertical Member

Sep 2023 – May 2024

CyberMeet Society, Indraprastha College for Women

- Planned and executed placement seminars and career workshops, coordinating with industry professionals, faculty, and student teams to ensure seamless event delivery.
- Designed and deployed promotional campaigns including emails, social media posts, and printed posters, significantly expanding event reach and registration.
- Authored post-event summary reports incorporating attendee feedback; recommendations were adopted in subsequent society events.
- Managed ongoing communication with 50+ students and cross-functional society members, ensuring alignment on timelines and deliverables.
